All data are based on the aggregation of whole block group units of geography to approximate CRU, HRU, Place and County boundaries. Part One and Part Three variables are drawn from 1990 and 2000 census 100% count files (STF1A and SF1, respectively). Part Two variables are drawn from 1990 and 2000 census sample data files (STF3A and SF3, respectively).

Census Designated Places (CDPs) are delineated for the decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide data for settled concentrations of population that are identifiable by name but are not legally incorporated under the laws of the state in which they are located. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or a other legal entity boundary have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary. There are no population size requirements for CDPs for Census 2000. For the 1990 and previous censuses, however, the U.S. Census Bureau required CDPs to qualify on the basis of various minimum population size criteria. As a result, several CDP's defined for the 2000 census were too small to be defined as CDPs in 1990.

*Race Counts exclude those who indicated that they are of two or more races. That is, 2000 race variables only include those who said that they are of one race.

** Areas having a CDP designation for the 2000 but not for the 1990 census. Comparison data are based on the 1990 census block group containing the area defined by the 2000 CDP. Caution should be used when interpreting trends for these small areas.

*** The classification of Industries and Occupations changed for some categories between 1990 and 2000, resulting in comparison of similar, but not identical groupings. Caution should be used when inferring trends for these variant groupings.

1 A small portion of the Aguila CRU is located in LaPaz County, and is represented in the database by Census Tract 201, Block Group 1 of LaPaz County. Also, the Congress CDP falls within BG 1 of Tract 14, Yavapai County, and is entirely classified within the Aquila CRU of the Wickenburg HRU. The Congress settlement should be classified within the Yarnell CRU of the Wickenburg HRU, but there are statistical realities that do not allow this refinement to be made. 2000 population characteristics of the Congress CDP area may be manually subtracted from the population characteristics of the Aquila CRU and then added to the Yarnell CRU if desired by the reader. However, the Congress CDP was not defined in 1990, so the entire Block Group 1 of Tract 14 is used to estimate the 1990 population characteristics of the Congress CDP.

**** Averages are based on those households reporting income from that source, and excludes those households not reporting any income from that source.
